

[San Francisco Environmental Justice Program](#)

Environmental justice is the fair treatment and meaningful involvement of all people, regardless of race, ethnicity, income, or education level, in environmental decision-making. Working closely with residents and businesses to make sure that the basic necessities of life—water, air, food, and shelter—are of the highest quality, the city's Environmental Justice (EJ) program has committed itself to providing fundamental rights to a safe and healthy environment in every San Francisco community. The program collaborates with other city agencies, nonprofit organizations, and community groups to promote the issues of air quality, food availability, renewable energy systems, sustainable land use, and the reduction of greenhouse gases.

[Solar Public Housing in San Francisco](#)

Mayor Gavin Newsom announced plans to install over 365 kw of solar panels on two San Francisco Housing Authority properties. The solar panels will provide hundreds of thousands of kilowatts of clean, renewable electricity to public housing residents. "With initiatives like GoSolarSF, San Francisco is lighting the way with solar power," said Mayor Newsom. "Solar power will reduce greenhouse gases, grow our green economy, and lead the state towards a future of clean, renewable energy."
